

National Care Connection

Enhancing Caregiver Effectiveness

# CareGiver360 Fact Sheet

CareGiver360 is an easy to use, interactive Web service that lets you create a secure Personal Care Guide to help you manage the care of your loved one. In an environment of high caregiver turnover, CareGiver360 provides clear, consistent instructions on the care of your loved one, even when you can't be there.

Your CareGiver360 Personal Care Guide is a comprehensive look at the care and lifestyle of your loved one: from their diagnosis and medication, to the activities they enjoy, and where they are most comfortable. It's everything you know about their needs, plus relevant information from CareGiver360's expansive library.

Because it's online, CareGiver360 makes it easier than ever to:

- Record and organize all the details that go into the care of your loved one—written instructions, photos and even videos.
- Share the guide with trusted members of your care team—only the people that you invite can view, download or update care instructions.
- Update the guide in real time as care requirements change— adjust care team members, add or remove care instructions, and attach standard procedures and best practices from CareGiver360's expanding library of resources.
- Be sure vital care instructions are always available, even when you aren't there to provide care.

CareGiver360 is Web-based and doesn't require any special software. A valid email address and a computer with Internet access are all you need to get started. After you register with CareGiver360, **the first 30 days are free**; continue using CareGiver360 after 30 days for only **\$39.95 per year**. Care team members you invite will continue to access CareGiver360 for free. Your subscription provides access to:

- CareGiver360's searchable library of cutting edge research and recommended best practices
- A community of caregivers, which includes a forum of CareGiver360 users and peer-to-peer support connections
- Customer care that actually cares, staffed by fellow caregivers and people passionate about helping you provide an important service to your loved one
- Up to four Personal Care Guides per subscription.

You can't always be there to care for your loved one, but with CareGiver360 you can be confident that those in your place have access to all of the information they need. Whether for just an evening of respite or for when you pass long-term care responsibilities to someone else, CareGiver360 is part of the legacy of care you leave behind. The gift of care that only you can give.
